Subject Index

Acceleratory mass spectrometry
Analysis of insoluble carbonaceous materials from airborne particles collected in pristine regions of Colorado, 189
Activation energy distribution
A kinetic study on chemical activation of holm oak wood, 117
Airborne particles
Analysis of insoluble carbonaceous materials from airborne particles collected in pristine regions of Colorado, 189
Algae
Characterization of algae by pyrolysis-direct chemical ionization (Tandem) mass spectrometry, 245
Alkyd resins
Structure determination of alkyd resins by simultaneous pyrolysis methylation, 233
Alkylation
Structure determination of alkyd resins by simultaneous pyrolysis methylation, 233
Analysis
Analysis of insoluble carbonaceous materials from airborne particles collected in pristine regions of Colorado, 189

Biomarkers
Thermal desorption as an analytical technique in biomarker analysis of immature coals, 41
Borosilicate
Analysis of lignin by pyrolysis–gas chromatography. I. Effect of inorganic substances on guaiacol-derivative yield from softwoods and their lignins, 59
Brown coals
Thermal desorption as an analytical technique in biomarker analysis of immature coals, 41

Characterization
Characterization of poly(styrene-dimethylsiloxane) block copolymer by high-resolution pyrolysis–gas chromatography/mass spectrometry, 79
Chemical vapor phase deposition
Laser-induced decomposition of trimethyl (methoxy)silane, hexamethyldisiloxane and tetramethoxysilane for production of silicon-containing coatings, 71
Chemically treated wood
A kinetic study on chemical activation of holm oak wood, 117
Chlorophyll a
Pyrolysis of chlorophyll a after preliminary heating at a moderate temperature: implications for the origin of prist-1-ene on kerogen pyroloysis, 207
Collision-induced dissociation
Characterization of algae by pyrolysis–direct chemical ionization (Tandem) mass spectrometry, 245
Conventional and laser-driven
Thermal reactions of decalin. I. A comparative study of conventional and laser-driven pyrolysis, 19
Curing
Structure determination of alkyd resins by simultaneous pyrolysis methylation, 233

Decalin
Thermal reactions of decalin. I. A comparative study of conventional and laser-driven pyrolysis, 19
Thermal reactions of decalin. II. A mass spectrometric study, 33
Decalyl radicals
Thermal reactions of decalin. I. A comparative study of conventional and laser-driven pyrolysis, 19
Depositional patterns
Particle size fraction and downhole depositional trends of a tropical domed peat deposit as determined by pyrolysis GC/FT-IR/FID and pyrolysis GC/MS, 293
Derivatization
Structure determination of alkyd resins by simultaneous pyrolysis methylation, 233
Differential thermal analysis
Investigations on the formation of potassium tetramolybdate via thermal decomposition of a new oxomolybdenum(VI) oxalato complex, 91
Dioxin
Thermal reaction of pentachlorophenol and its salts, 341
Dioxolane
Radical-sensitized thermal decomposition of 1,3-dioxolane in the gas phase, 219
Direct chemical ionization

Characterization of algae by pyrolysis–direct chemical ionization (Tandem) mass spectrometry, 245
Discriminant analysis
Characterization of algae by pyrolysis–direct chemical ionization (Tandem) mass spectrometry, 245
Downhole trends
Particle size fraction and downhole depositional trends of a tropical domed peat deposit as determined by pyrolysis GC/FT-IR/FID and pyrolysis GC/MS, 293
Dynamic and isothermal
Thermal reaction of pentachlorophenol and its salts, 341

E-Glass fibres
An analytical investigation of silane coupling agents on glass fibres, 261

Factor loadings plots
Principal components analysis of quantitative pyrolysis–gas chromatography and organic petrographic data of kerogens, 277
Fluidized bed
An investigation of the factors controlling the pyrolysis product yield of Greek wood biomass in a fluidized bed, 127

Gas chromatography
An analytical investigation of silane coupling agents on glass fibres, 261
Analysis of insoluble carbonaceous materials from airborne particles collected in pristine regions of Colorado, 189
Analysis of lignin by pyrolysis–gas chromatography. I. Effect of inorganic substances on guaiacol-derivative yield from softwoods and their lignins, 59
Discrimination and clustering of streptococci by pyrolysis gas chromatography/mass spectrometry and multivariate data analysis, 97
Microfurnace pyrolysis injector for capillary gas chromatography, 269
Particle size fraction and downhole depositional trends of a tropical domed peat deposit as determined by pyrolysis GC/FT-IR/FID and pyrolysis GC/MS, 293
Principal components analysis of quantitative pyrolysis–gas chromatography and organic petrographic data of kerogens, 277
Structure determination of alkyd resins by simultaneous pyrolysis methylation, 233
The thermal degradation of poly(aryl-ether-ether-ketone) (PEEK) as monitored by pyrolysis-GC/MS and TG/MS, 163
Thermal decomposition of polystyrene: volatile compounds from large-scale pyrolysis, 143
Gas-phase reactions
Radical-sensitized thermal decomposition of 1,3-dioxolane in the gas phase, 219
Gases
An investigation of the factors controlling the pyrolysis product yield of Greek wood biomass in a fluidized bed, 127
Glass fiber
Analysis of lignin by pyrolysis–gas chromatography. I. Effect of inorganic substances on guaiacol-derivative yield from softwoods and their lignins, 59
Gravimetry
Thermal reaction of pentachlorophenol and its salts, 341
Guaiacol derivatives
Analysis of lignin by pyrolysis–gas chromatography. I. Effect of inorganic substances on guaiacol-derivative yield from softwoods and their lignins, 59

Hexamethyldisiloxane
Laser-induced decomposition of trimethyl (methoxy)silane, hexamethyldisiloxane and tetramethoxysilane for production of silicon-containing coatings, 71
High-resolution mass spectrometry
Characterization of algae by pyrolysis–direct chemical ionization (Tandem) mass spectrometry, 245
High-resolution pyrolysis–GC
Characterization of poly(styrene-dimethylsiloxane) block copolymer by high-resolution pyrolysis–gas chromatography/mass spectrometry, 79
Hydrocarbons
Thermal desorption as an analytical technique in biomarker analysis of immature coals, 41

Infrared multiphoton dissociation
IR laser-induced pyrolysis of CF_3CHO and CF_3CDO in the presence of oxygen, 175
Infrared spectroscopy
Investigations on the formation of potassium tetramolybdate via thermal decomposition of a new oxomolybdenum(VI) oxalato complex, 91
Particle size fraction and downhole depositional trends of a tropical domed peat deposit as determined by pyrolysis GC/FT-IR/FID and pyrolysis GC/MS, 293
Insoluble carbonaceous materials
Analysis of insoluble carbonaceous materials from airborne particles collected in pristine regions of Colorado, 189
Isoprenoids
Pyrolysis of chlorophyll a after preliminary

heating at a moderate temperature: implications for the origin of prist-1-ene on kerogen pyrolysis, 207

Kerogen
Pyrolysis of chlorophyll a after preliminary heating at a moderate temperature: implications for the origin of prist-1-ene on kerogen pyrolysis, 207
Kerogens
Principal components analysis of quantitative pyrolysis–gas chromatography and organic petrographic data of kerogens, 277
Kinetics
Thermal analysis using mass spectrometry: A review, 1

Laser-induced decomposition
Laser-induced decomposition of trimethyl (methoxy)silane, hexamethyldisiloxane and tetramethoxysilane for production of silicon-containing coatings, 71
Lignin
Analysis of lignin by pyrolysis–gas chromatography. I. Effect of inorganic substances on guaiacol-derivative yield from softwoods and their lignins, 59
Liquids
An investigation of the factors controlling the pyrolysis product yield of Greek wood biomass in a fluidized bed, 127

Mass spectrometry
Analysis of insoluble carbonaceous materials from airborne particles collected in pristine regions of Colorado, 189
Discrimination and clustering of streptococci by pyrolysis gas chromatography/mass spectrometry and multivariate data analysis, 97
Particle size fraction and downhole depositional trends of a tropical domed peat deposit as determined by pyrolysis GC/FT-IR/FID and pyrolysis GC/MS, 293
The thermal degradation of poly(aryl-ether-ether-ketone) (PEEK) as monitored by pyrolysis-GC/MS and TG/MS, 163
Thermal analysis using mass spectrometry: A review, 1
Thermal decomposition of polystyrene: volatile compounds from large-scale pyrolysis, 143
Thermal reactions of decalin. II. A mass spectrometric study, 33
Methylation
Structure determination of alkyd resins by simultaneous pyrolysis methylation, 233
Microfurance pyrolyzer
Microfurnace pyrolysis injector for capillary gas chromatography, 269

Molybdenum(VI) oxalato complex
Investigations on the formation of potassium tetramolybdate via thermal decomposition of a new oxomolybdenum(VI) oxalato complex, 91
Multivariate data analysis
Discrimination and clustering of streptococci by pyrolysis-gas chromatography/mass spectrometry and multivariate data analysis, 97

Organic facies
Principal components analysis of quantitative pyrolysis–gas chromatography and organic petrographic data of kerogens, 277
Organofunctional groups
An analytical investigation of silane coupling agents on glass fibres, 261

Peat
Particle size fraction and downhole depositional trends of a tropical domed peat deposit as determined by pyrolysis GC/FT-IR/FID and pyrolysis GC/MS, 293
Pentachlorophenol
Thermal reaction of pentachlorophenol and its salts, 341
Petrographic variables
Principal components analysis of quantitative pyrolysis–gas chromatography and organic petrographic data of kerogens, 277
Phenols
An investigation of the factors controlling the pyrolysis product yield of Greek wood biomass in a fluidized bed, 127
Poly(aryl-ether-ether-ketone)
The thermal degradation of poly(aryl-ether-ether-ketone) (PEEK) as monitored by pyrolysis-GC/MS and TG/MS, 163
Poly(styrene-dimethylsiloxane)
Characterization of poly(styrene-dimethylsiloxane) block copolymer by high-resolution pyrolysis–gas chromatography/mass spectrometry, 79
Polymers
Thermal analysis using mass spectrometry: A review, 1
Polystyrene
Thermal decomposition of polystyrene: volatile compounds from large-scale pyrolysis, 143
Potassium tetramolybdate
Investigations on the formation of potassium tetramolybdate via thermal decomposition of a new oxomolybdenum(VI) oxalato complex, 91
Prist-1-ene
Pyrolysis of chlorophyll a after preliminary heating at a moderate temperature: implica-

tions for the origin of prist-1-ene on kerogen pyrolysis, 207
Pyrolysis capillary GC/MS
Characterization of poly(styrene-dimethylsiloxane) block copolymer by high-resolution pyrolysis–gas chromatography/mass spectrometry, 79

Radicals
Radical-sensitized thermal decomposition of 1,3-dioxolane in the gas phase, 219
Reaction mechanism
Thermal reactions of decalin. I. A comparative study of conventional and laser-driven pyrolysis, 19
Thermal reactions of decalin. II. A mass spectrometric study, 33

Sensitized pyrolysis
Radical-sensitized thermal decomposition of 1,3-dioxolane in the gas phase, 219
Silane coupling agents
An analytical investigation of silane coupling agents on glass fibres, 261
Softwoods
Analysis of lignin by pyrolysis–gas chromatography. I. Effect of inorganic substances on guaiacol-derivative yield from softwoods and their lignins, 59
Solvent extraction
Thermal desorption as an analytical technique in biomarker analysis of immature coals, 41
Streptococci
Discrimination and clustering of streptococci by pyrolysis-gas chromatography/mass spectrometry and multivariate data analysis, 97
Structural changes
Thermal analysis by diffuse reflectance Fourier transform infrared spectroscopy-mass spectrometry, 325

Tandem mass spectrometry
Characterization of algae by pyrolysis–direct chemical ionization (Tandem) mass spectrometry, 245
Tetramethoxysilane
Laser-induced decomposition of trimethyl (methoxy)silane, hexamethyldisiloxane and tetramethoxysilane for producton of silicon-containing coatings, 71
Thermal analysis
Thermal analysis by diffuse reflectance Fourier transform infrared spectroscopy-mass spectrometry, 325
Thermal analysis using mass spectrometry: A review, 1
Thermal desorption
Thermal desorption as an analytical technique in biomarker analysis of immature coals, 41
Thermogravimetric analysis
Investigations on the formation of potassium tetramolybdate via thermal decomposition of a new oxomolybdenum(VI) oxalato complex, 91
Thermogravimetry
The thermal degradation of poly(aryl-ether-ether-ketone) (PEEK) as monitored by pyrolysis–GC/MS and TG/MS, 163
Toxicity
Thermal decomposition of polystyrene: volatile compounds from large-scale pyrolysis, 143
Trifluoroacetaldehyde
IR laser-induced pyrolysis of CF_3CHO and CF_3CDO in the presence of oxygen, 175
Trimethyl(methoxy)silane
Laser-induced decomposition of trimethyl(methoxy)silane hexamethyldisiloxane and tetramethoxysilane for production of silicon-containing coatings, 71

UV spectrometry
Characterization of poly(styrene-dimethylsiloxane) block copolymer by high-resolution pyrolysis-gas chromatography/mass spectrometry, 79

Very low pressure
Thermal reactions of decalin. II. A mass spectrometric study, 33

Wood biomass
An investigation of the factors controlling the pyrolysis product yield of Greek wood biomass in a fluidized bed, 127

X-ray diffraction
Investigations on the formation of potassium tetramolybdate via thermal decomposition of a new oxomolybdenum(VI) oxalato complex, 91
